CAREER OBJECTIVE

Detail-driven ICT Professional and Cisco Networking Academy alumnus specializing in network administration, infrastructure resilience, and enterprise systems support. Proven capability in managing secure connectivity, optimizing routing and switching configurations, and maintaining high-availability enterprise environments.

Adept at bridging the gap between core network architecture and backend data layers (including T-SQL database endpoints) to guarantee zero-downtime operations. Actively pursuing an ICT Honors degree to further leverage advanced architectural concepts within enterprise infrastructure frameworks.

TECHNICAL SUMMARY

- **Networking Foundations:** TCP/IP Suite, Routing & Switching, LAN/WAN Architecture, Network Troubleshooting
- Experience supporting administrative systems and ensuring data accuracy in structured environments.
- **Infrastructure & Security:** Command Line Interface (CLI) Configuration, Access Control Systems (ACS), Network Security Protocols
- Understanding of data integrity, compliance-oriented processes, and documentation standards.
- **Enterprise Systems Support:** Point-of-Sale (POS) Integration, Financial Platform Support, Automated System Operations
- **Data & Analytics:** T-SQL, Database Administration (SA-SAMS), System Ingestion Optimization
- **Emerging Tech:** Enterprise AI Governance, Copilot Ecosystems, Data Visualization Narrative

TECHNICAL PROJECTS

Windows Server 2022 Home Lab Setup

- Built a VMware-based virtual server lab for hands-on practice in Active Directory, and Group Policy.
- Configured Active Directory for user account creation, password policies, and access control.

PROFESSIONAL EXPERIENCE

Network System Support Specialist

Mr Price Group Head Office | Full-time | Durban, South Africa

March 2026 – Present

- **Infrastructure & Access Management:** Administer Command Line Interface (CLI) configurations and Access Control Systems (ACS) to regulate secure network boundaries and enforce corporate information governance protocols.
- **Enterprise Platform Administration:** Provide high-tier technical infrastructure support for critical financial transaction pipelines, automated systems, and customer verification workflows (including Money Hub, Money Bot, USP, and PowerCurve infrastructure environments).
- **Network Path Optimization:** Diagnose and resolve complex routing, switching, and transport-layer faults under tight operational deadlines to protect system uptime and streamline multi-channel retail operations.
- **Compliance Infrastructure Support:** Oversee datalink and network verification paths for secure user identity ingestions, including active mobile telecom regulations (RICA compliance pipelines).

Education Assistant

Department of Basic Education

June 2025 – November 2025

- **Database Administration:** Managed localized data integrity, server inputs, and secure user management policies on the core centralized SA-SAMS database platform.
- **Infrastructure Technical Support:** Deployed, maintained, and troubleshoot physical and logical local area network (LAN) workstations and terminal hardware across administrative structures.
- **Systems Asset Management:** Audited and optimized school digital systems infrastructure, software installations, and peripheral connectivity points to ensure zero downtime for daily academic operations.
- Developed strong communication skills through daily interaction with educators and administrators in a structured environment.
- Acted as a bridge between technical systems and end users, improving adoption and reducing operational friction

CORE SKILLS

- Analytical Thinking – able to break down business and technical problems into structured steps.
- User Support & Customer Service Orientation
- Hardware & Peripheral Setup (laptops, printers, basic devices)
- Clear Communication with Technical and Non-Technical Users

- Adaptability and Willingness to Learn in Enterprise Environments
- High attention to detail
- Professional Discipline – comfortable working in structured, deadline-driven environments

EDUCATIONAL BACKGROUND

Bachelor of ICT (Honors) — In Progress

Durban University of Technology (DUT)

Expected Completion: 2027

Durban University of Technology

Bachelor of Information Communication Technology – NQF 7

Average: 70.1%
